Produktionsplanering och optimering – Utmaningar och mojligheter

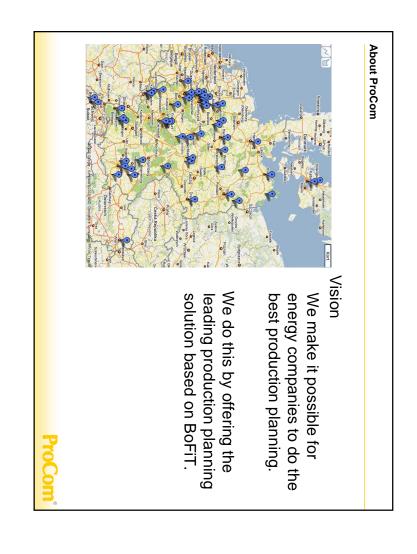

Jan Madsen, ProCom GmbH

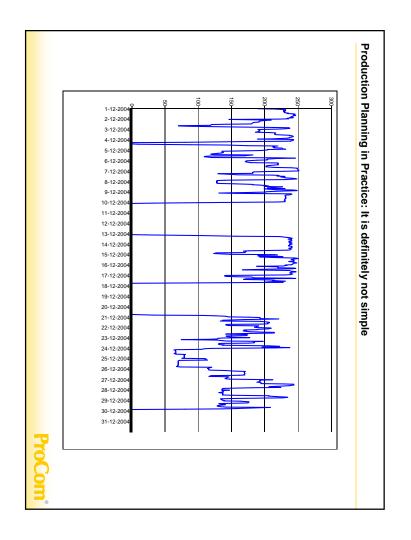

ProCom

Contents

- The challenges in relation to production planning and optimazation
 - O Planning situation is getting more and more complicated
 - Timepressure
 - Increasing business challenges
- How do we handle these challenges?
 - O Automate, integrate and organize to reduce mistakes
 - What has other energy companies done to deal with these challenges?

ProCom

Production Planning: Impact of deregulation

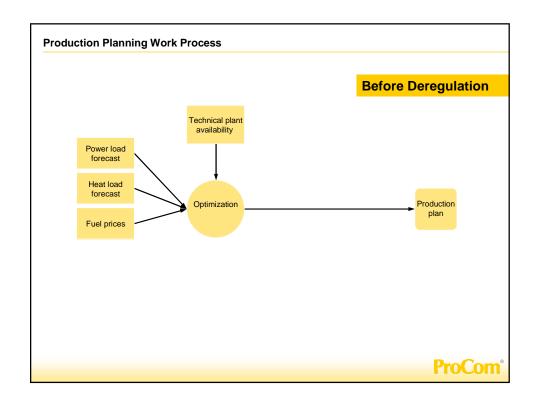

Impact of the deregulation of energy markets

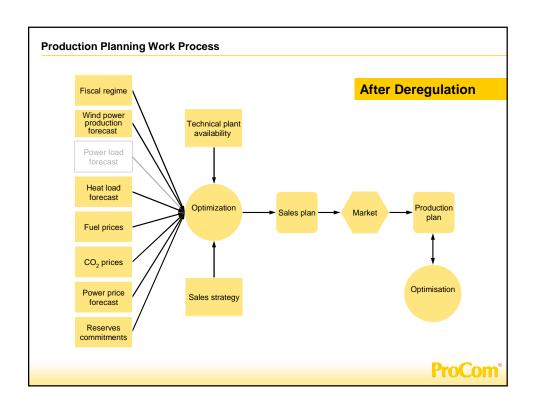

- O From minimising cost of delivery to maximising profits
- O New markets have emerged spot power, CO2, biomass etc.
- O Volatile product and fuel prices

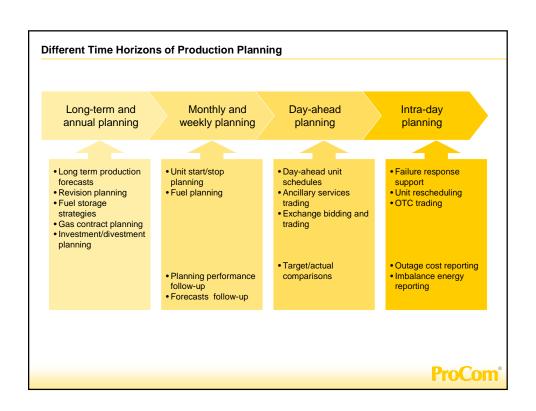

Consequence

Production planning has become more complex and more important.

ProCom⁶

Does your production planning look a bit like this?

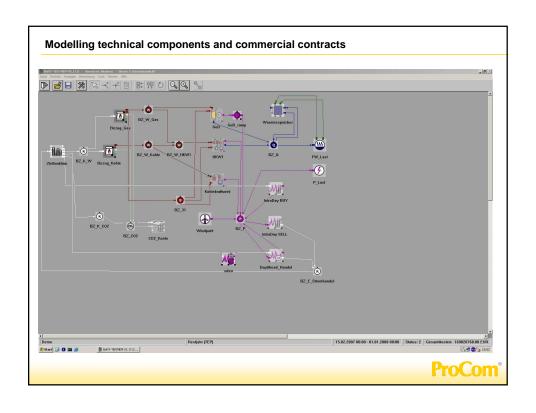

ProCom

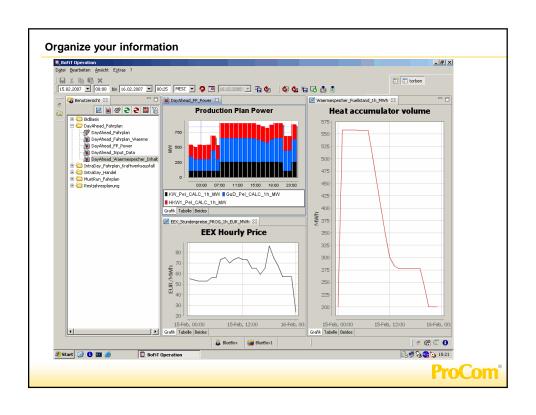

The Solution

- Organize
 - O Business processes
- Automate
 - O Data transfer
- Integrate
 - O IT systems

ProCom'

Conclusion

• Reliability Reliable and stable planning leading to

lower risk of errors

Transparency Transparency of system secures trust in

solutions

Automation Automation reduces manual work and

leads to improved business processes

and planning results

Consistency Integrated system secures consistent

planning

Improved market focus

ProCom

Achievements and Next Steps

- Achievements
 - O No market failures leading to blackouts
 - O Good it-systems for optimization have been developed
 - Production planning has become a commercial core competence
- Next steps forward
 - Facilitation of process execution
 - Increasing traceability
 - Securing process quality

ProCom

Conclusion

- Production planning has come a long way since the days of the regulated energy markets
- In the last years, focus has been on developing tools that can support production planning from an engineering point of view
- The next steps are to facilitate the integration into daily business operations with increasing amounts of inputs and handling a multitude of scenarios.
- The true challenge is to exploit the full potential of a production planning solution!
- Thereafter: Deal with uncertainty?
